Guanrun Steering Racks

AnHui GuanRun Automobile Steering System Co.,Ltd. is specialized in the research and development of power steering gear since its establishment in 2003, and now has developed into a professional manufacturer of rack-and-pinion hydraulic power steering-gear. After years of Pragmatism & Innovation, Our company strictly implements in the ISO/TS 16949 international standard quality control. We had passed ISO/ TS16949 Quality Management System Certification, which lay a good foundation for our quality and development on 2012. And we have gotten IATF16949 on 2019.

Our company owns professional production equipment & assembly line equipment for power steering gear, and is equipped with advanced assembly testing facility of steering valves and steering gear. Specialized production provides good guarantee for our top-quality product.

We attach great importance to talents as well as the overall quality of employee, and have strong capability of designing and developing new products, and pay great attention on quality control. Holding our principle of "Leading technology, efficient design, in time delivery, credited cooperation", we welcome customers from all around the world and offer satisfactory products and services to you with advanced equipment, sophisticated technology and complete management.

With the further expansion of Scale, We believe we are the most promising manufacturer of power steering gear, and WE also have trust in our future cooperation. Whatever changes the world takes, AnHui GuanRun people will never change in their pursuit of better quality and further development.
